Today’s businesses are exposed to an increasing number of sophisticated threats and risks that need to be managed properly. It is predicted that there will be a ransomware attack on businesses every 11 seconds by 2021. It is more important than ever to build security into every aspect of your organization through effective risk identification, vulnerability mitigation, reliable data protection, and fulfillment of legal, regulatory, and compliance.

OUR SERVICES

- Application Security Assessment
- External/Internal Penetration Testing
- Network Security Assessment
- Physical Security Assessment
- Purple/Red Team Assessment
- Social Engineering Assessment
- Vulnerability Assessment
- 3rdParty Risk Assessment
- Security Architecture Assessment
- Security Posture Assessment

BENEFITS

- Identify and understand current risk posture
- Prioritize highest risks and initiatives
- Align business with cybersecurity-related initiatives
- Improve and sustain risk mitigation efforts
- Adherence to compliance objectives and standards
- Shape and scope security investment decisions
- Reduce risk of data breach, business disruption, regulatory fines, and litigation
OUR WINNING METHODOLOGY

ISA’s proven methodology for delivering our Security Advisory & Assessment Services is based on industry standards and enhanced by our deep technical experience. We aim to understand your business model, requirements, constraints, and realities before recommending and delivering our services.

1 DISCOVER

Streamline the interview and the fact-finding process to develop an understanding of your known threats, risks, and vulnerabilities. Blend the findings with resources from our industry experience and top threat intelligence to complete the picture of your current cybersecurity landscape.

2 EVALUATE

Assess your current cybersecurity posture against potential threats. Match your existing defenses against the scope, likelihood, and impact of a cyber attack. Evaluate your current programs and policies against industry and technology best practices.

3 REPORT

Deliver a clear and compelling action plan to improve your cybersecurity posture so you know where, when, why, and how to get started. Implement improvements to strengthen your cybersecurity program through consultation or managed services offerings.

ABOUT ISA

At ISA Cybersecurity, our mission is to help customers achieve their privacy and security goals, and to be proactive in the fight against security threats. ISA is Canada’s leading cybersecurity-focused solutions and services provider, with nearly three decades of experience delivering cybersecurity services and people you can trust.
