

# Protect all your endpoints

## Cybersecurity threats target everyone, including your organization.

Canadian SMBs are under attack every day, and many struggle with maintaining a cybersecurity strategy. You can invest in a mature cybersecurity posture. However, managing cybersecurity solutions is complex and requires costly investments in infrastructure and skilled staff.

### PROTECT EDR benefits in a nutshell:

- › Your internal IT and support teams can maintain focus on supporting your company's core business.
- › ISA can detect unusual activity on your behalf and can be trusted to take proactive action at any time.
- › **PROTECT EDR** is a cloud-based services that offer you insights through easy-to-understand dashboards.
- › ISA provides advanced Endpoint Security Services that surpass off-the-shelf Endpoint Protection (EPP) or Endpoint Detection & Response (EDR) solutions.
- › **PROTECT EDR** integrates seamlessly into your existing systems, programs & operations
- › Multiple layers of protection are provided via a single (not multiple) agent to avoid integration issues.

## Let ISA's industry leading SOC-as-a-Service do the work for you!
